## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The preamble of the claims stated that only the extension is being claimed, therefore limitations with respect to the conventional ladder, e.g. a greater width than the conventional ladder, etc. renders the claims indefinite, furthermore, how can claim 12 depends from claim 11 which recites that the extension has a greater width than the conventional ladder?

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, and 11-16,18-20 as understood and assuming to be definite, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Brugner. Brugner shows an extension 29. The extension is capable of being used with conventional ladders of different widths, e.g., conventional ladders having a width less than or equal to the width of Brugner's extension.

Claims 1-10, and 11-20 as understood and assuming to be definite, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by GB pat. '236 to Lee. Lee shows an extension 10. The extension is capable of being used with conventional ladders having a width equal to the width of Lee's extension.

Claim 12 as understood and assuming to be definite, is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Okie et al. Okie in fig.11 shows an extension with rung engaging means 40,10.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-10 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brugner in view of Bauer. Brugner shows the claimed extension with the exception of the support element. Bauer shows a support element at 70. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide a support element, as taught by Bauer, to Brugner for bracing his extension against a vertical support.
